

# Jane Doe

[jane.doe@example.com](mailto:jane.doe@example.com) | [linkedin.com/in/jane-doe](https://linkedin.com/in/jane-doe) | [github.com/janedoe](https://github.com/janedoe)

Software engineer focused on backend systems and developer tooling. Open to new opportunities starting October 2026.

## Experience

### Software Engineer

Example Corp

Sept. 2023 – Present

Paris, France

- Owned a high-throughput event-ingestion service (10k req/s) written in Python and Go
- Drove a 40% reduction in p99 latency through query optimization and targeted caching
- Led the migration of observability stack from custom dashboards to OpenTelemetry + Grafana
- Mentored two junior engineers through onboarding, code review, and project co-ownership

### Software Engineering Intern

Sample Labs

Jun. 2022 – Sept. 2022

Dublin, Ireland

- Prototyped a gRPC-based authorization service, delivered end-to-end with tests and docs
- Contributed to the internal developer portal: self-serve service scaffolding, CI templates
- Wrote a postmortem on a production incident, adopted as a reference for the engineering org

## Projects

**dotfiles** | Shell, Nix, Neovim, tmux

Ongoing

- Cross-platform development environment (macOS + Linux) bootstrapped with a single command
- Declarative package management via Nix flakes; reproducible across machines
- Neovim config with LSP, tree-sitter, and a curated plugin set tuned for systems work

**pkg-sandbox** | Python, Docker, CLI

2025

- CLI that spins up isolated environments to audit unknown Python packages before installing
- Captures network calls, file writes, and syscalls during a trial install for review
- Published on PyPI with 1k+ monthly downloads

**mini-db** | Rust, B-trees, WAL

2024

- Educational key/value store: custom B-tree index, write-ahead log, crash recovery
- Companion blog series explaining each subsystem, 3k reads

## Technical Skills

**Languages & Certifications:** English (native), French (B2)

**Programming:** Python, Go, TypeScript, Rust, Bash

**Frameworks & Libraries:** FastAPI, React, Next.js, gRPC, SQLAlchemy

**Software Engineering:** REST/gRPC APIs, SQL, automated testing, CI/CD, technical writing

**Infrastructure & DevOps:** Docker, Kubernetes, Linux, AWS (EC2, S3, RDS), Terraform

**Tools:** Git, GitHub, VS Code, Neovim, Grafana, OpenTelemetry

## Education

### Example University of Technology

MSc Computer Science — Systems track

Anytown, USA

Sept. 2020 – Jun. 2023

### International Sample College

Exchange semester — distributed systems, databases

Dublin, Ireland

Feb. 2022 – May 2022

# Jane Doe

[jane.doe@example.com](mailto:jane.doe@example.com) | [linkedin.com/in/jane-doe](https://linkedin.com/in/jane-doe) | [github.com/janedoe](https://github.com/janedoe)

Ingénieure logiciel spécialisée en systèmes backend et outillage développeur. Disponible à partir d'octobre 2026.

## Expériences

### Ingénieure Logiciel

Example Corp

Sept. 2023 – Aujourd'hui

Paris, France

- Responsable d'un service d'ingestion d'événements à fort débit (10k req/s), Python et Go
- Réduction de 40% de la latence p99 par optimisation des requêtes et cache ciblé
- Migration de la stack d'observabilité vers OpenTelemetry et Grafana
- Mentorat de deux ingénieurs juniors : onboarding, revue de code, co-ownership de projets

### Stage d'ingénierie logicielle

Sample Labs

Juin 2022 – Sept. 2022

Dublin, Irlande

- Prototypage d'un service d'autorisation gRPC, livré avec tests et documentation
- Contribution au portail développeur interne : scaffolding self-service, templates CI
- Rédaction d'un postmortem d'incident adopté comme référence par l'organisation ingénierie

## Projets

**dotfiles** | Shell, Nix, Neovim, tmux

En cours

- Environnement de développement cross-platform (macOS + Linux) initialisable en une commande
- Gestion déclarative des paquets via Nix flakes ; reproductible entre machines
- Configuration Neovim : LSP, tree-sitter, plugins sélectionnés pour les travaux systèmes

**pkg-sandbox** | Python, Docker, CLI

2025

- CLI qui crée des environnements isolés pour auditer les paquets Python avant installation
- Capture les appels réseau, écritures fichiers et syscalls durant un essai d'installation
- Publié sur PyPI, plus de 1k téléchargements mensuels

**mini-db** | Rust, B-trees, WAL

2024

- Base clé/valeur éducative : index B-tree custom, write-ahead log, reprise sur crash
- Série d'articles détaillant chaque sous-système, environ 3k lectures

## Compétences Techniques

**Langues & Certifications** :Anglais (natif), Français (B2)

**Programmation** :Python, Go, TypeScript, Rust, Bash

**Frameworks & Bibliothèques** :FastAPI, React, Next.js, gRPC, SQLAlchemy

**Ingénierie logicielle** :APIs REST/gRPC, SQL, tests automatisés, CI/CD, documentation technique

**Infrastructure & DevOps** :Docker, Kubernetes, Linux, AWS (EC2, S3, RDS), Terraform

**Outils** :Git, GitHub, VS Code, Neovim, Grafana, OpenTelemetry

## Formation

### Example University of Technology

Master en informatique — parcours systèmes

Anytown, USA

Sept. 2020 – Juin 2023

### International Sample College

Semestre d'échange — systèmes distribués, bases de données

Dublin, Irlande

Fév. 2022 – Mai 2022
